EXPERIENCE

Nintendo of America, Redmond – Tester 2

Responsibilities

- **Testing** sensitive third-party applications for safety and quality standard compliance.
- **Communicating** vital error information to third-party developer coordination groups for efficient turnaround and effective product releases across global gaming markets.
- **Operating** in two to two dozen person teams across multiple international offices to verify viability in each product across many potential user conditions.
- **Supporting** fellow testers through a wide knowledge base, quality communication, and the flexibility to fill in responsibilities at positions below and above the job title.

Achievements

- **Maintains** an internal database that has condensed the varied experiences and knowledge bases across associated and international departments in order to increase efficiency in training and testing.
- **Develops** and contributes to multiple initiatives throughout the company, both operational and recreational, to help improve the quality of life of fellow employees.
- **Gains** constant self-motivated training through online learning, industry literature, and interdepartmental outreach when the opportunity is available.

Aston Carter, Redmond — Associate Tester
